# Our Journey

Saitama started as a community token project in June 2021. Led by a team of professionals with solid backgrounds in different areas.

Saitama has grown into a multi-market, global business taking its token to an estimated market capitalization of over 7.5 Billion USD in November 2021 during its all time high, which placed it in a position among the Top 40 projects at the time.

From the very beginning, Saitama has set new standards in alt-DeFi projects by fully doxxing our team and registering a company to run the business.
